HOOK

Right now, someone in Mississippi is searching for a payday loan.

Does your ad budget know that?

EPCVIP sells leads to lenders.
Leads are worth more in high-demand markets.

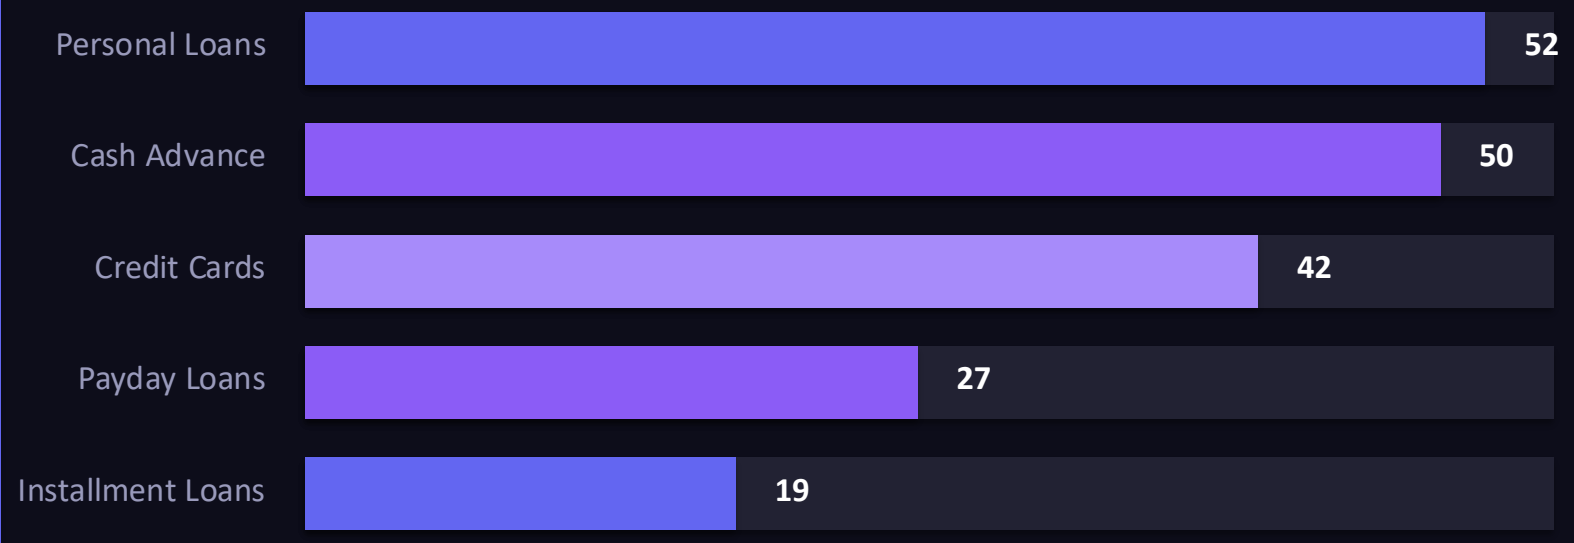
So which markets have the highest demand — and why?

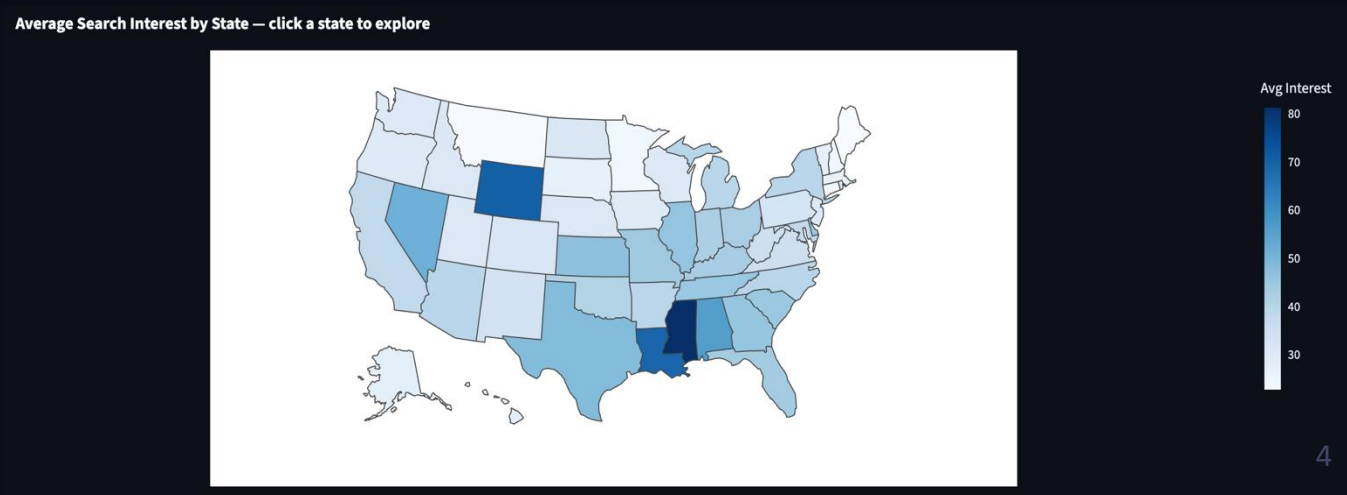
A pipeline that tracks financial keyword demand across every US state — automatically.

pytrends API → GitHub Actions → Snowflake → dbt → Streamlit Dashboard

Runs daily. No manual work. Always fresh.

Personal loans lead nationally. But the map tells a different story.





The South is underbanked. That's where the demand is.

CATEGORY	TOP STATE	SCORE
Short-term credit	Mississippi	**100**
Revolving credit	Wyoming	**100**
Consumer lending	Mississippi	**84.5**

100

payday loan score
in Mississippi
vs. 38 national average

Mississippi leads 2 of 3 categories — lower incomes, fewer banks, highest unmet credit demand.

RECOMMENDATION

Go where the demand is.

- Shift 30–40% of short-term credit budget to Mississippi, Louisiana, Wyoming
- Higher-intent leads in underserved markets with lower advertiser competition
- Lower cost-per-lead vs. saturated markets like California, New York, Texas
- Pipeline refreshes daily — rerun this analysis monthly as demand shifts
